PLAY tables, Bruunmunch 2013

“In 2013 we fell in love with the style of the 50s”

This fascination inspired us to create the PLAY series. We wanted to make retro coffee tables from solid wood that extended the freedom to play with personal décor.

We have now made this possible with our new laminate tabletops, finished with a veneer edge using the same wood as the tables' legs. This pairing makes PLAY stand out as a timeless and personal touch in your private interior.

We invite you to explore the many different combinations of shapes, sizes and finishes that make PLAY tables a dream for interior designers and design lovers.

Yours sincerely

“We are passionate about tables”

We've been looking for inspiration for a new dining table for a long time and the idea came with the design of the coffee tables. There has never been a more logical time to create a contemporary dining table from solid wood, than in this era when wood is once again modern. At the same time, this enduring retro trend inspired us to pay tribute to the design of the 50s, this time with PLAY dinner.

We are launching the table in two shapes, a round shape and a Lamé curve inspired by its inventor, the French mathematician, Gabriel Lamé.
